1. The first part of the paper is devoted to a general
discussion of the principles of the theory of
the function of the mind. It is shown that the
function of the mind is to represent the
world as it is, and that this function is
achieved by the use of symbols. The symbols
are used to represent the objects of the
world, and the mind is able to manipulate
these symbols in order to form a picture of
the world. This picture is then compared
with the actual world, and the mind is able
to correct its picture if it is found to be
inaccurate. This process is repeated until the
picture is a true representation of the world.
